DR. PRATT PRAISES WORK OF BIG HEALTH CONGRESS

Writes from Washington of Matters Interesting to Hawai

"Well, it's all over, and it certainly has been a great Congress—one which cannot help but bring about great good not only to the people of the United States but to those all over the world," writes Dr. J. S. Pratt to the Star-Bulletin under date of September 28, from Washington, D. C., where he has been attending the International Congress of Hygiene and Demography.

Dr. Pratt, president of the Territorial Board of Health, shows, in his communication, that Hawaii's part in the gathering of hygienic experts from all parts of the world has been an active one, the exhibits of leprosy lesions and experiments in that line of medical work attracting the attention of all, while at the same time he and his associate representatives from this Territory, Dr. George W. McCoy and Dr. Hubert Wood, of Wailuku, have gained some highly valuable information that should aid them materially in solving health problems at home.

The Congress closed September 27, following which Dr. McCoy returned to his old home at Bedford, Penn., where he will continue his visit some time, reaching San Francisco in time to catch the Honolulu, which sails for Honolulu October 30. Dr. Pratt went to New York, where he investigated some health matters, thence to Othaca, to visit his son a few days. His plan is to start westward stopping off at Buffalo, Toledo and Chicago, and possibly a day at Sacramento, Cal., to visit his friend Dr. Snow, secretary of the California Board of Health. He expects to catch the Wilhelmina at San Francisco October 23. During his last day at the national capital he writes that he chanced to meet Attorney S. M. Ballou and Mrs. Ballou, with whom he had a long chat.

Although the Congress closed September 27, the exhibit was kept open until October.

Infantile Paralysis Discussed.
 One of the most interesting features of the Congress, Dr. Pratt writes, was the discussion of infantile paralysis, following the reading of papers on the subject by such men as Dr. Netter of Paris, Dr. Francis Harbitt of Norway, Dr. Simon Flexner of the Rockefeller Institute of Medical Research and Prof. Alfred Pettersson, of Stockholm, Sweden.

"In the discussion following," says Dr. Pratt, "a very important statement was made by Dr. Rosenau, of Harvard University, that in laboratory experiments conducted by himself he had succeeded in developing or transmitting the disease in a monkey by means of flies. The flies having been placed in a cage with a monkey which had previously been given the disease, were transferred to another cage containing a healthy monkey, and the healthy one developed infantile paralysis. He had succeeded in this test in six instances."

"While this does not prove conclusively that flies are responsible for the spread of the disease, yet it is an important discovery and may lead to much in further experiments later."

"Other important papers read and which will prove of value to Hawaii were 'The Disposal of Sewage in Tidal Waters,' by Geo. R. Soper, president of the Metropolitan Sewerage Commission, New York City, and 'Advancement in Quarantine Practice Incident to the Opening of the Panama Canal,' by Surgeon-General Leonard E. Cofer, of the U. S. Public Health Service."

"In regard to Dr. Soper's paper: He stated that bathing in New York harbor had been prohibited, except in such places as an analysis of the water showed it to be equal to drinking water in purity, and also that the taking of shell fish from the harbor had been prohibited. I hope to be able to get the Commission's report when I go to New York."

"Dr. Cofer's paper was very complete and I have arranged to have a conference with him early next week and get further details."

Leprosy Is Discussed.
 "The models of leprosy lesions which brought here have created a great deal of interest among the foreign delegates as well as the health officials of the various states."

"There is so much to tell about that I have not the time to write it all, but it can wait until my return home. So much has been crowded into such a short time that it will take time to digest it all and segregate that which will be of particular interest to Hawaii."

The Washington Herald of September 24, in its story of the first day's proceedings, says in part:

"At least one discovery that promises to work a tremendous saving in human life was announced. This was by Dr. Sir Thomas Oliver, of the College of Medicine, University of Durham, of Newcastle, England, who addressed the general session of the congress at the Pan-American Union building last night. As the result of scientific experiments to which he was directed particularly by the appalling loss of life through the explosions of coal mines in Newcastle, Dr. Oliver announced the discovery of a chemical fluid which, by acting as an absorbent of coal dust, will prove a practical preventative for these explosions."

"On the nature of the distinguished gathering at the congress the Herald says: 'Except at diplomatic receptions at the White House, Washington has seldom seen a more brilliantly colored assemblage than that at the session of the congress last night. Among the hundreds of delegates from abroad are numbered many officials of European governments whose work in the cause of public health has brought upon them, in addition to world-wide fame, decorations from their own and other governments. These appeared in all the glory of their brilliant uniforms, gold lace and decorations, many having worn their dress uniforms throughout the day. Hardly less brilliant were the dining rooms, corridors and lobbies of Washington hotels throughout the day and evening.'"

California during recent months and leaves this work at the urgent request of Mr. Smith.

The first meeting after Mr. Holmes' arrival will be a conference of the council of the Inter-Church Federation at 12:30 Friday afternoon in Cooke hall, Y. M. C. A. building. Here the full details concerning the campaign will be explained and arrangements made for Mr. Holmes' visit. On Sunday morning he will preach at the Central Union Church and in the afternoon he will speak at the Y. M. C. A. upon the subject, "Men, Religion, and the Nation". Sunday night he will speak at the Methodist Church. On Monday next at 6:30 p. m. he will speak in the Y. M. C. A. to a selected group of eighty men representing the five co-operated churches of Honolulu in the Inter-Church Federation, and on the following Wednesday night he will speak at a large meeting in the Davies Memorial Chapel.

It should be remembered that this campaign is largely a laymen's movement. It is the awakening of interest in work at home corresponding to the interest in foreign work expressed in the laymen's missionary movement.

GROWTH OF SWISS SAVINGS BANKS
 (From Vice Consul General Harry A. McBride, Zurich.)
 The following interesting statistics covering the year 1908, which have only recently been published, are good evidence of the tendency of the Swiss people to save their money, and also serve to show the healthy financial condition of the majority of the inhabitants of the Confederation.

1908 \$295,869,000. A comparison of these figures with those of population shows that for every inhabitant of Switzerland in 1908 there was \$86.46 deposited in the savings banks, while the savings per capita in 1897 were only \$59.64. It is also interesting to note that the average amount of each savings account was \$156.62. Stated in other words, of every 1,000 inhabitants in the Confederation 522 had savings bank books in 1908, and the average amount per account was \$156.62, a record surpassed by very few, if any, countries. The average account in 1897 was \$145.33.

There is no general regulation regarding the limit to which savings deposits may be made, and each bank makes its own stipulations concerning this point. Most banks accept interest-bearing savings deposits up to \$380, the depositors receiving no interest on amounts above this sum. A few banks, however, limit the amount to \$965. The interest paid on savings accounts ranges from 3 to 4 1/2 per cent.

An entire family of Palmer, Texas was wiped out when an interurban trolley struck their auto killing the six occupants.

Over-Night FEDERAL Wireless To the Advertiser

"If there is danger of blood poisoning or lockjaw," Doctor Terrell said, "it will be indicated Friday by the presence of pus. If there is no indication of pus, then the colonel will again be practically a well man several days later."

Colonel Roosevelt's feeling towards Schranke, the man who attempted his life was expressed here this afternoon by Philip Roosevelt a cousin and the former President's traveling companion. The colonel, he said, is not angry with Schranke, but feels impatient towards the man who attempted his life.

Telegrams and cablegrams of sympathy and congratulation are arriving in the hospital at an average of one hundred hourly. The doctors, however, are permitting him to see but few of the messages.

An analysis of the bullets remaining in the revolver which John Schranke used to shoot Col. Roosevelt showed that the bullets had not been poisoned. John Schranke, the would-be assassin of Colonel Roosevelt, was questioned closely by the police today in an effort to discover if there was anything like a plot to take the President's life. Schranke absolutely denies any political affiliations whatsoever, stating that he belongs to no order or band of anarchists, nihilists, socialists or anything of the kind. He ascribes his act to a "study of history."

Mrs. Cecil M. Hawkins in San Francisco stated positively that she is yet engaged in spite of the news from Honolulu that J. B. Lightfoot has denied the engagement.

"I have a cablegram from Bert," said Mrs. Hawkins, "in which he tells me that he has no intention of breaking the engagement and that the particulars of the story have been written me, to arrive here on the mail brought by the steamship China."

"You see I'm still wearing his ring and I wouldn't do that if I were not engaged."

The fortress of Houma, the last between Tusheti and Scutari, has surrendered to the Montenegrins. Among the Turkish prisoners already captured are sixty-two officers, including a colonel and the commandant in Tusheti.

The Serbian government has ordered its minister in Constantinople to arrange for his immediate departure. A dispatch received says the Serbian consuls in Turkey also have been ordered to leave.

With the testimony today of Mrs. Herman Rosenthal, the State expected to rest its case against Police Lieut. Charles E. Becker, on trial for Rosenthal's murder on July 16 in front of the Hotel Metropole.

Mrs. Rosenthal told the story of her husband's business relations with Becker simply and without emotion.

The Australian Rugby team played the Stanford team today. Stanford won by a score of 13 to 12.

PEOPLE SHOULD GUARD AGAINST APPENDICITIS

Honolulu people who have stomach and bowel trouble should guard against appendicitis by taking simple buckthorn bark, glycerine, etc., as compounded in Adler-ika, the German appendicitis remedy. A SINGLE DOSE relieves sour stomach, gas on the stomach and constipation INSTANTLY because this simple mixture antiseptically cleanses the digestive organs and draws off the impurities. The Hollister Drug Co.

Dr. Louis Meunier of Paris declared that crawling after meals is a fine aid to digestion. He says soon prevents the stagnation of food in the "gastric pocket" of the upright position.

Extraordinary Precautions

are taken by us to insure the delivery to our customers of a perfectly pure milk. Not only are our dairies maintained in sanitary condition, but all the milk is brought to our central station on Sheridan street and there treated to an electric purifying process. The pure milk is fed from this machine into absolutely clean bottles.
